4+ years Backend and platform QA	1,000+ Dashboard users in org scope	30+ Microservices tested	AI in QA Talks, tooling and workflow adoption
--	---	--	---

01
Profile

Strong in API testing, regression automation, quality metrics, test strategy and cross-functional delivery. I focus on scalable quality systems, clear risk signals and pragmatic engineering collaboration.

02**Experience****QA Engineer**

2023 - Present

T-Bank

- Defined QA strategy from scratch as the sole QA engineer in a cross-functional product team.
- Automated regression for a mission-critical service, improving release speed and confidence.
- Built a department-wide quality metrics dashboard for an organization of 1,000+ employees.
- Delivered talks on testing and AI, including an internal meetup with 400+ attendees.

QA Engineer

2021 - 2023

Scalable Solutions

- Tested backend systems of a 30+ microservices crypto-fintech platform.
- Created 1,500+ Allure test cases and expanded Postman collections by 900+ API endpoints.
- Reported 300+ defects and completed 190+ Jira tasks across product releases.
- Implemented CI-integrated regression checks and Java smoke tests for core services.

03**Skills****Testing**

Manual and automated testing, test planning, test design, defect lifecycle, risk-based testing.

Backend

REST API, Postman automation, SQL, message queues, microservices, Gatling performance tests.

Delivery

Jira, Confluence, Allure, Git, Jenkins, GitLab CI/CD, Scrum, Kanban, SDLC and STLC.

Observability

ELK log analysis, Prometheus, Grafana, quality metrics, dashboards and alerting.

04**Education****Master's Degree**

Emperor Alexander I St. Petersburg State Transport University

2014 - 2020
